

**EVERYWHERE**  
ALWAYS CONNECTED

# EVERYWHERE APP

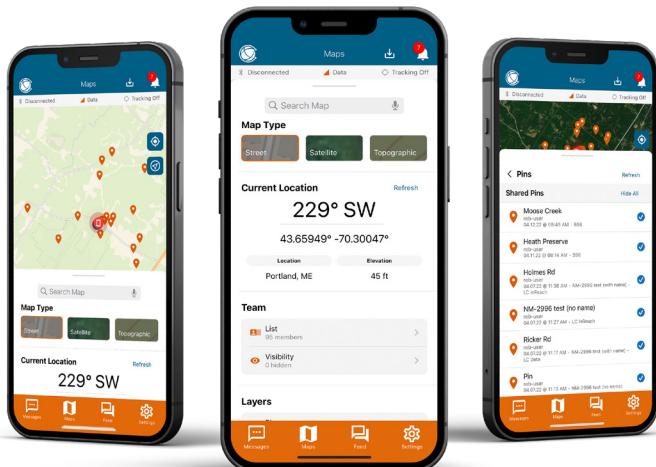

SAFE – CONNECTED – PROTECTED

## THE APP FOR PEOPLE WHO WORK EVERYWHERE

*Our iOS and Android App is the tool your teams need to be Always Connected.™ With EVERYWHERE Intelligent Routing™ that seamlessly and automatically switches between cellular, WiFi and satellite (when paired with a Garmin inReach), your teams will never be without vital communications.*

The App provides EVERYWHERE customers individual and team situational awareness via a mapping overlay. In addition, the App provides chat with internal users and global text and email. Users in distress can activate a two-step SOS mode to summon emergency assistance.

When paired, the App extends communication and tracking globally, and can also be used to update configuration settings and to create the personality of the paired communicator. The App supports EVERYWHERE's Intelligent Routing platform, leveraging the most efficient network for communications back to the EVERYWHERE Hub.

### KEY FEATURES

Global SOS

EVERYWHERE Intelligent Routing™

Chat with team members  
and dispatchers
