

Global Satellite Team Communications

Push a button, get help anywhere in the world. We provide global satellite communication solutions to enable corporations and government entities to protect and communicate with their **most important asset, their people.**

Global SOS Location, Tracking & Control Secure Messaging

WHO IS EVERYWHERE?

Led by a team that has deployed \$2B in connected and IoT services, EVERYWHERE delivers purpose-built software solutions for enterprise and government, powered by patented technology deployed in mission-critical environments for over 10 years.

EVERYWHERE
ALWAYS CONNECTED

EVERYWHERE PRODUCTS

Our product portfolio includes personal communication and asset tracking devices, smartphone apps with intelligent routing, and a powerful central management platform:

EC-100

A hand-held Iridium satellite device that provides global SOS, personnel and team tracking and communications. The EC-100 provides mobile situational awareness and duty of care for a company's most important asset, their people. The EC-100 operates independently, or paired with the EVERYWHERE App.

EVERYWHERE INREACH DEVICES

The inReach® Mini, Explorer+ and SE+ are small compact satellite communicators, when combined with EVERYWHERE's purpose-built enterprise software and intelligent routing, enable organizations to track and communicate with their teams deployed around the globe.

EVERYWHERE INTELLIGENT ROUTING

A routing technology that provides seamless and dynamic routing of your communications in the most efficient manner based on available bandwidth among multiple network options - Satellite, Cellular and Wi-Fi. Integrated within the EVERYWHERE App, as well as within the EVERYWHERE Hub, Intelligent Routing delivers messages between the App and the Hub, providing always-connected communications in the most cost-effective manner.

EVERYWHERE HUB

A comprehensive back-end solution for monitoring and managing your workers and assets. The Hub provides real time situational awareness and asset tracking by displaying position, status, and message information and enables data communication with assets in the field.

EVERYWHERE APP

An Android and iOS application purpose-built for enterprise and government with employees on the go. The App operates independently on Wi-Fi or cellular networks, or it may be paired with the EC-100 and inReach devices to provide global Iridium satellite connectivity and communications.
