

EVERYWHERE
ALWAYS CONNECTED

Secure inReach® Mini 2

powered by **GARMIN**

THE BEST OF BOTH WORLDS:

GARMIN HARDWARE, EVERYWHERE SOFTWARE

The Secure inReach Mini 2 by Garmin with EVERYWHERE software, is a handheld satellite communicator that provides **24/7 global SOS with secure personnel and team tracking and two-way communications.**

Paired with the EVERYWHERE App and Hub, it delivers enhanced mapping capabilities, location monitoring, and secure messaging by leveraging an Iridium® Short Burst Data (SBD) modem for global communications.

SPECIFICATIONS

OUR PRODUCTS

Our product portfolio includes personal communication and asset tracking devices, smartphone apps with EVERYWHERE Intelligent Routing,TM and a powerful central management platform

GARMIN INREACH[®] SATELLITE COMMUNICATORS

The inReach Mini 2, Secure inReach Mini 2, and the inReach Explorer+, are small compact satellite communicators, when combined with EVERYWHERE's purpose-built enterprise software, enable organizations to track and communicate with their teams deployed around the globe.

EVERYWHERE IRIDIUM EDGE SOLAR

The EVERYWHERE Iridium Edge Solar is a slap and track, standalone and programmable, solar-powered Short Burst Data (SBD[®]) device that offers real-time GPS tracking and local wireless sensor and communication capabilities over Bluetooth.

EVERYWHERE HUB

A comprehensive back-end solution for monitoring and managing your workers and assets. The Hub provides real time situational awareness and asset tracking by displaying position, status, and message information and enables data communication with assets in the field.

EVERYWHERE APP

An Android and iOS application purpose-built for enterprise and government with employees on the go. The App operates independently on Wi-Fi or cellular networks, or it may be paired with inReach devices to provide global Iridium satellite connectivity for secure and encrypted communications.

EVERYWHERE INTELLIGENT ROUTINGTM

A routing technology that provides seamless and dynamic routing of your communications in the most efficient manner based on available bandwidth among multiple network options - Satellite, Cellular and Wi-Fi. Integrated within the EVERYWHERE App, as well as within the EVERYWHERE Hub, Intelligent Routing delivers messages between the App and the Hub, providing always-connected communications in the most cost-effective manner.
